EDUCATION

The University of Texas at Austin BBA, Canfield Business Honors, **Business Analytics (BAX)** May 2028
Minor: Computer Science, Entrepreneurship | Overall GPA: 3.97
Honors/Awards: University Honors, Canfield BHP Scholar

Technical Skills: SQL, Python, R, JavaScript, HTML/CSS, TypeScript, Playwright, Kubernetes, Jira, Cursor, Microsoft Office (Excel, PowerPoint, Word), GitHub, Lovable, Agile, React, RAG, Transformers, Prompt Engineering, Claude SDK, Codex

Coursework (Honors): Data Science for Business, Managerial Accounting, Decision Science, Operations Management, IT Management

Coursework: Software Design, Database Management, Python Programming, Computer Programming, Predictive Analytics, Data Visualization

WORK EXPERIENCE

IBM – Product Manager Intern; San Jose, CA May 2026 – August 2026

Content Cortex team integrating agentic automation into File Management Platform to improve operational efficiency for enterprises worldwide

- Defined accessibility acceptance criteria for an agentic file management platform, **identifying 5+ user edge cases** to improve UI/UX
- Mapped undefined user flows and backend data structures to uncover user friction points, **setting 3+ KPIs** to guide product strategy
- Drove QA strategy for Navigator’s RAG agent, partnering with senior devs on 4+ Playwright UI/UX test automations that surfaced 3+ defects
- Translated Content Cortex backend architecture into non-technical pitch decks, enabling sales to tailor AI capabilities to customer pain points

PocketWorlds (YC S18) – Product Management Intern; Austin, TX April 2025 – August 2025

Social gaming startup building virtual worlds and online communities for 10M+ users; deploying AI automation across multiple departments

- Optimized customer service AI agent using context engineering to handle 80% of tickets, **improving customer satisfaction to 96%**
- Defined automation criteria to **design 15+ AI workflows** to triage daily customer support tickets, reducing company costs by \$200K annually
- Identified inefficient query routing across 95 dashboards; shipped an agentic RAG classifier with GPT-4o, saving the data team 10+ hrs weekly
- Constructed Monte Carlo simulations (100K+ runs) to **optimize \$6M marketing ROI**, delivering insights guiding C-suite forecasting

McCombs School of Business – Undergraduate Research Assistant; Austin, TX June 2025 – Present

Decision science research using machine learning and optimization to improve transformer-based recommender systems for retail personalization

- Defined evaluation requirements for retail recommender systems, comparing embedding vs. transformer models on accuracy and latency
- Analyzed self-attention architecture in existing research to inform design choices for a retail personalization model, collaborating with faculty

DigiMax – Co-Founder; Barrington, IL January 2023 – January 2026

Video production agency delivering tailored content and growth strategies for 12+ small-business owners driving customer acquisition efforts

- Built a video production agency with **\$12,000 in revenue**, allocating \$6,000 in funding toward equipment and marketing to prioritize growth
- Executed client interviews and competitive analysis to **find 5+ pain points**, designing tailored marketing pitches to secure 12+ clients
- Initiated a business model pivot from social media marketing to video production, developing go-to-market strategy through product roadmaps that drove **80%+ client retention** and a 30%+ sales boost

Resia – Product Intern; Austin, TX August 2024 – May 2025

AI-powered home-design startup helping homeowners visualize personalized living spaces and manage renovations from concept to completion

- Conducted **50 customer interviews** and competitive analysis to prioritize 3+ pain points, partnering with ops team to define product strategy
- A/B tested email outreach with data-driven customer targeting and GPT prompt engineering, generating 300+ leads at **15% conversion rate**

PROJECTS

Stock Market Research Bot – Product Developer – SQLite, Claude Agent SDK, Streamlit June 2026

- Scoped a daily stock-ranking tool for portfolio insight, building a live Streamlit dashboard with 6 data pipelines to **rank 170+ tickers**
- Designed a 7-agent research pipeline each with distinct functions, using a SQLite journal and **LLM evaluations** for consistent, accurate context
- Identified overfitting and look-ahead bias as key model-reliability risks, designing a data-validation split that caught 3+ false-positive signals

Cheetah Drill – Product Manager; Austin, TX – Cursor February 2026

- Modeled subsurface data from 3+ geological databases into **interactive 3D visualization dashboard**, creating optimal subway digging routes
- Won **First Place Overall (\$3,000)** among 450+ applicants and 70+ teams, leading a 4-person cross-functional team under a tight 6-hr deadline

Guppi – Product Developer; Austin, TX – TypeScript, React, Supabase, Figma, Lovable October 2025

- Built Guppi, a full-stack event-discovery platform for Austin events, **prioritizing 4+ features** and iterating with 5+ judges' feedback
- Won **Best Technical Execution Award (\$150)** at a hackathon amongst 90+ attendees, designing an accessible customer-centric UI/UX

LEADERSHIP EXPERIENCE & ACTIVITIES

Texas Momentum – President, Student Organization; Austin, TX January 2025 – May 2026

- Grew community membership by 200% by organizing 3+ hackathons, partnering with 8+ VC/Y Combinator leaders to raise **\$25,000 in event sponsorships**, serving 350+ attendees and distributing a prize pool of \$15,000+
- Built 20+ connections with local VC firms and early-stage startups through outreach efforts, including 20+ cold emails and LinkedIn outreach, to set up 8+ VC panels, technical workshops, and networking opportunities

ADDITIONAL INFORMATION

Interests: Acoustic Guitar, Ping Pong, Hiking, Photography, Weightlifting, Pickleball, Longhorn Car Club, Hindi (Fluent)

Work Eligibility: Eligible to work in the U.S. with no restrictions
